Building plan for #1 Science and Technology Battalion, Thabeikkyin

- Note: This is the layout for the battalion living quarters, not the factories.
- The road sign in the upper left says "Towards Tagaung" and in the lower left "Towards Seven Mile Intersection." The road sign in the far right center says "Towards the factory."
- In the map key (lower right) red is for first stage under construction thirty buildings, five factories; yellow is second stage construction thirteen buildings; and white is earmarked buildings.
- Construction of all the earmarked buildings would expand the Battalion's accommodations as much as ten times.
- There is a lot of detail on this map: Notably, from the top, twenty-three buildings for sergeant/ warrant officers, two red, two yellow, and nineteen white; twenty-five buildings for corporals, eight red and seventeen white; and fifty-seven buildings for junior officers, five red and fifty-two white. (The last are likely the accommodations for the Battalion's scientists.) At the bottom are four quarters for privates (60 each). Two messes are identified, one for 180 and another for 250.
