

## Topographical map showing the location of the Nuclear Battalion

- The Battalion lies in a valley between two 2,000 meter mountains. It is clearly a secret site, and many of the smaller buildings are probably obscured by trees.
- The map shows the road and power lines to the five factories. The red arrow in the center identifies the “Main Factory,” which in 2006 was not yet constructed. Another factory to be constructed (the Second Factory) is just to the east of it.

### Topographical map detail

- This shows a detail of the previous map. The main factory is at the grey arrow. Its map coordinate is R-883479.
- The five factories are identified as technology workshops.
- In the key, red is to be constructed during this period and grey is earmarked.
- The map also shows two hydroelectric dams to be constructed on the main creek.
